

Appln. No. 10/643,511
Amendment dated October 3, 2005
Reply to Office Action of June 3, 2005

AMENDMENTS TO THE SPECIFICATION

Please replace paragraph [0033] of the present application as published with the following amended paragraph:

[0033] A screen title and name is shown at 302 ("Matter Number Screen"). The type of call ("outbound" in this example), the contact and the duration of the call are shown at 404. The user enters a client number in box 304 and a matter number in box 306 using input device 208 (FIG.2). Recently entered numbers 406 are shown in a list 408 ~~comprises~~ comprising a plurality of entries. In this exemplary embodiment, there are an administrative number 410 and personal use number 412 previously entered into wireless handheld device 102 (in accordance with FIG. 3 above). Several recently used entries are illustrated at 408. If the current contact 404 is in the list of recently used numbers 408, it may be highlighted, as shown at 414. Optionally, there may be a description of the client number and matter number.

Please replace paragraph [0059] of the present application as published with the following amended paragraph:

[0059] Turning now to FIG.11, a flowchart for processing within queue manager 716 referenced in box 944, FIG.9 and box 1024. Processing starts at oval 1102, which is the ~~being~~ beginning of a loop, as is known in the art. Processing moves to decision diamond 1104 where a determination is made whether there is a new message in the queue to be sent to application server 126 (FIG.1). If there is not, then processing moves to box 1106 where the queue is empty and waiting for messages. Processing loops back to decision diamond 1104.
